

KSK92 Subwoofer Stacking Kit

*Subwoofers are not included

Stack up for next level bass

The KSK92 subwoofer stacking kit is designed to effortlessly merge up to three KC92 subwoofers into a single, powerful unit. With easy installation via threaded inserts on the rear plate of the KC92, stacking subwoofers vertically is a breeze, and can help deliver even higher levels of output and performance, without sacrificing valuable floor space.

Stacking KC92 subwoofers can increase the maximum output by up to 9.5dB – the difference in listening to a rock concert and hearing a jet plan take off from the runway. Alternatively, each subwoofer can be played at a lower level individually, providing better dynamics and headroom for a more accurate performance.

Crafted from durable aluminium, the frames provide a sturdy foundation, while a soft material layer sits between each subwoofer, ensuring they remain scratch-free. By positioning the frames discreetly at the rear after stacking, the result is an excellent audio experience and a clean, seamless aesthetic.

Specifications

Dimension per frame (H x W x D)	360mm x 15mm x 10mm (14.2in. x 0.6in. x 0.4in.)
Dimension per soft material layer (H x W)	310mm x 262mm (12.2in. x 10.3in.)
Weight per kit	0.41kg (0.9lbs)

Summary of features

- Designed for KC92
- Stack up to three KC92 subwoofers vertically, optimising bass and space without compromise
- Robust aluminium frames ensure secure stacking, providing a sturdy foundation for multiple subwoofers
- Soft material layers safeguard against scratches
