

# KEF

## R3

THERE ISN'T ROOM here to list the myriad changes to KEF's revamped R Series, but the improvements and different approach to its Uni-Q driver array build on existing strengths to make the R3 standmount a real crowd-pleaser. A three-way bass reflex design, it's unfussy when it comes to placement within a room and delivers a precise sound with clear, focused soundstaging and arresting resolution to voices and instruments. Its totally 'together' presentation works across music genres, and has a weighty and well-controlled bass that everyone will love.
